

## Team Retrospective Report

**Team:** The Gauntlet

**Retrospective Report #:** 4

**Members:** David Johnson , Grant Turner , Brint Nielson , Aaron Martinez , Will Tatum , Kris Gavvala

### Current Status

1. Give yourselves a pat on the back! List the team's accomplishments.

The team did a great job at getting hardware onto the glove. We have some work on stretch goals that we can work on in the next week. We also got the glove circuitry looking nice and made a lot of progress on finalizing this project. We also have got some good testing in.

2. How is the team doing with communication? How will the team adjust going forward?

Overall communication has been good and has helped us get in good work out of class. We will keep doing our communication well and making sure to meet up when most of us are free outside of class.

3. How is the team doing with time? (Is the project on track, behind schedule, ahead of schedule?) How will the team adjust going forward?

Behind where we should be, we have integrated the hardware onto the glove but we need to test and make the glove look nicer.

Keep doing	Start doing	Stop doing
Putting in good work	Catching up on lack of progress	Lacking occasionally in Jira
Working outside of class time together		Falling behind
Communicating well		
Doing better at Jira
