

## Individual Weekly Report 11

**Name:** Aaron Martinez

**Team:** The Gauntlet

**Date:** 4/21/25

### Current Status

1. What did you **personally** work on this past week?

Task	Status	Time Spent
Putting top cover on	done	30 min
Replacing wires with thicker ones	done	1.5 hr
Cover wires and mount board	In progress	2 hr

Include **screenshots/graphics** to illustrate what you did this past week:

2. What problems did you run into? What is your plan for them?

Ran into the screws for mounting the buttons and cover being too short. We were able to find small and long screws at home depot.

3. What is the current overall project status from your perspective?

The current status of the project is about 90%. All that's left is a few minor code refinements and hardware features.

4. How is your team functioning from your perspective?

The team is functioning great. Everybody is showing up outside of class outside of one person but otherwise almost everybody does their work.

5. What new ideas did you have or skills did you develop this week?

The new ideas we had this week were to adjust the wrist cover we have, separating the board from your arm. We had the idea to reroute the usb to plug it in on the edge rather inside of the glove.

6. Who was your most awesome team member this week and why?

Most awesome team member this week is brint. He was able to get the 3D print we needed this week before the presentation.

### **Plans for Next Week**

What are you going to work on this next week?

Going to work on finishing the hardware. This includes adding the spacers, finishing covering the wires, securing the board better, and any other hardware polishing.
