

Individual Weekly Report

Name: Brint Nielson

Team: The Gauntlet

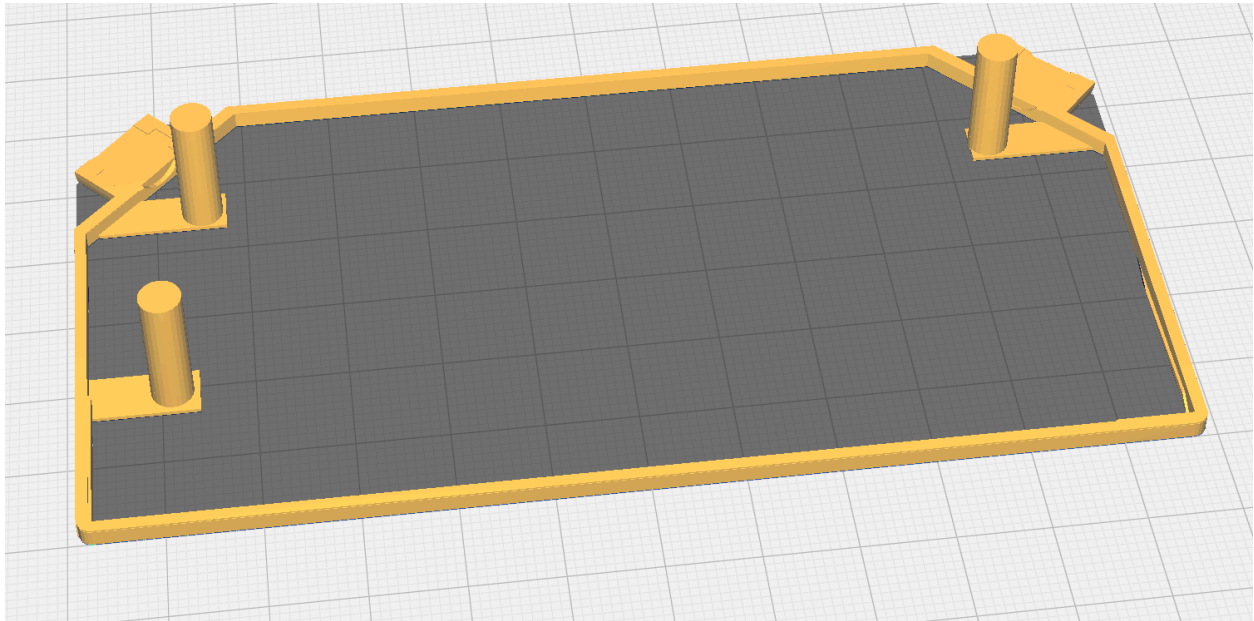

Date: 4/14/2025

Current Status

1. What did you **personally** work on this past week?

Task	Status	Time Spent
Make new stl files for new needs and test prints	In progress	7 Hour

Include **screenshots/graphics** to illustrate what you did this past week:

2. What problems did you run into? What is your plan for them?

Did not work on drivers this week as I think we have refined the glove without drivers enough to be good without the need for drivers, and instead drivers would be way too much work for this late in the semester.

3. What is the current overall project status from your perspective?

Further refining and testing and then prettying it up.

4. How is your team functioning from your perspective?

Great we are close to finalizing and working on problems we have had.

5. What new ideas did you have or skills did you develop this week?

Learned how bad drivers are and got more of an idea of how to 3d print the final things we need when our hardware is ready for it.

6. Who was your most awesome team member this week and why?

I would put Kris and Will since they put in a lot of work over the weekend to get code refined.

Plans for Next Week

What are you going to work on this next week?

Finish up 3d prints and put them in and help with finalizing code.
