

Individual Weekly Report 7

Name: Aaron Martinez

Team: The Gauntlet

Date: 3/24/25

Current Status

1. What did you **personally** work on this past week?

Task	Status	Time Spent
Glove prototype	Done	5hr
Glove testing	Done	1hr

Include **screenshots/graphics** to illustrate what you did this past week:

2. What problems did you run into? What is your plan for them?

We ran into the mouse being moved when trying to click. This is because the flex sensors are sensitive. We need to fine tune the sensitivity. We had the idea of adding dead space also.

3. What is the current overall project status from your perspective?

The project is about 65%-70% done. We need to refine things and get it closer to the final product.

4. How is your team functioning from your perspective?

The team is functioning well. Everyone is on task and on time.

5. What new ideas did you have or skills did you develop this week?

I developed my soldering and wiring skills when building the prototype. This prototype helped teach me how to make the final product.

6. Who was your most awesome team member this week and why?

Will was our most awesome team member this week because he got the battery unstuck.

Plans for Next Week

What are you going to work on this next week?

I won't be able to work too much due to an exam but I plan to have the sensitivity done with the flex sensors and maybe reduce the clutter of the wiring to get it closer to the final product.
