# Individual Weekly Report

Name: Brint Nielson
Team: The Gauntlet
Date: 4/7/2025

Current Status

1. What did you **personally** work on this past week?

Task	Status	Time Spent
Develop and test drivers	In progress	4 Hour
Adjust STL files for print casing and print casing	Complete for most just need final measurements after device testing	5.5 hour

Include **screenshots/graphics** to illustrate what you did this past week:

2. What problems did you run into? What is your plan for them?

Even though drivers are a stretch goal we wanted to get them done before this week but we ran into the problem of non stretch goals had to take priority and we weren't able to test the drivers like we needed.

3. What is the current overall project status from your perspective?

Finalizing putting together and then working on prettying it up.

4. How is your team functioning from your perspective?

Great we have the ability to test and will keep refining it and making it look prettier.

5. What new ideas did you have or skills did you develop this week?

Learning just how hard drivers are to understand for Arduino and how annoying Bluetooth LE can be. Also learned more how to 3d print stuff.

6. Who was your most awesome team member this week and why?

I would put Kris, Aaron, and Grant as the most awesome as they were on the hardware side and put in a lot of work this past week to get it together.

Plans for Next Week

What are you going to work on this next week?

First making sure the glove works well and prettying it up and then stretch goals as well.
.
